

# Introduction to ArcGIS Online

February 18, 2020

Dennis Milechin, P.E.  
Research Computing Services  
[rcs.bu.edu](http://rcs.bu.edu)  
[help@scc.bu.edu](mailto:help@scc.bu.edu)

# Outline

- **Lecture**
  - **What is GIS?**
  - **GIS Theory**
    - Geographic coordinate system
    - Projections
    - Spatial data types
  - **ArcGIS Online – What is it?**
- **Hands On Portion**

# What is GIS?

- **Geographic Information System**

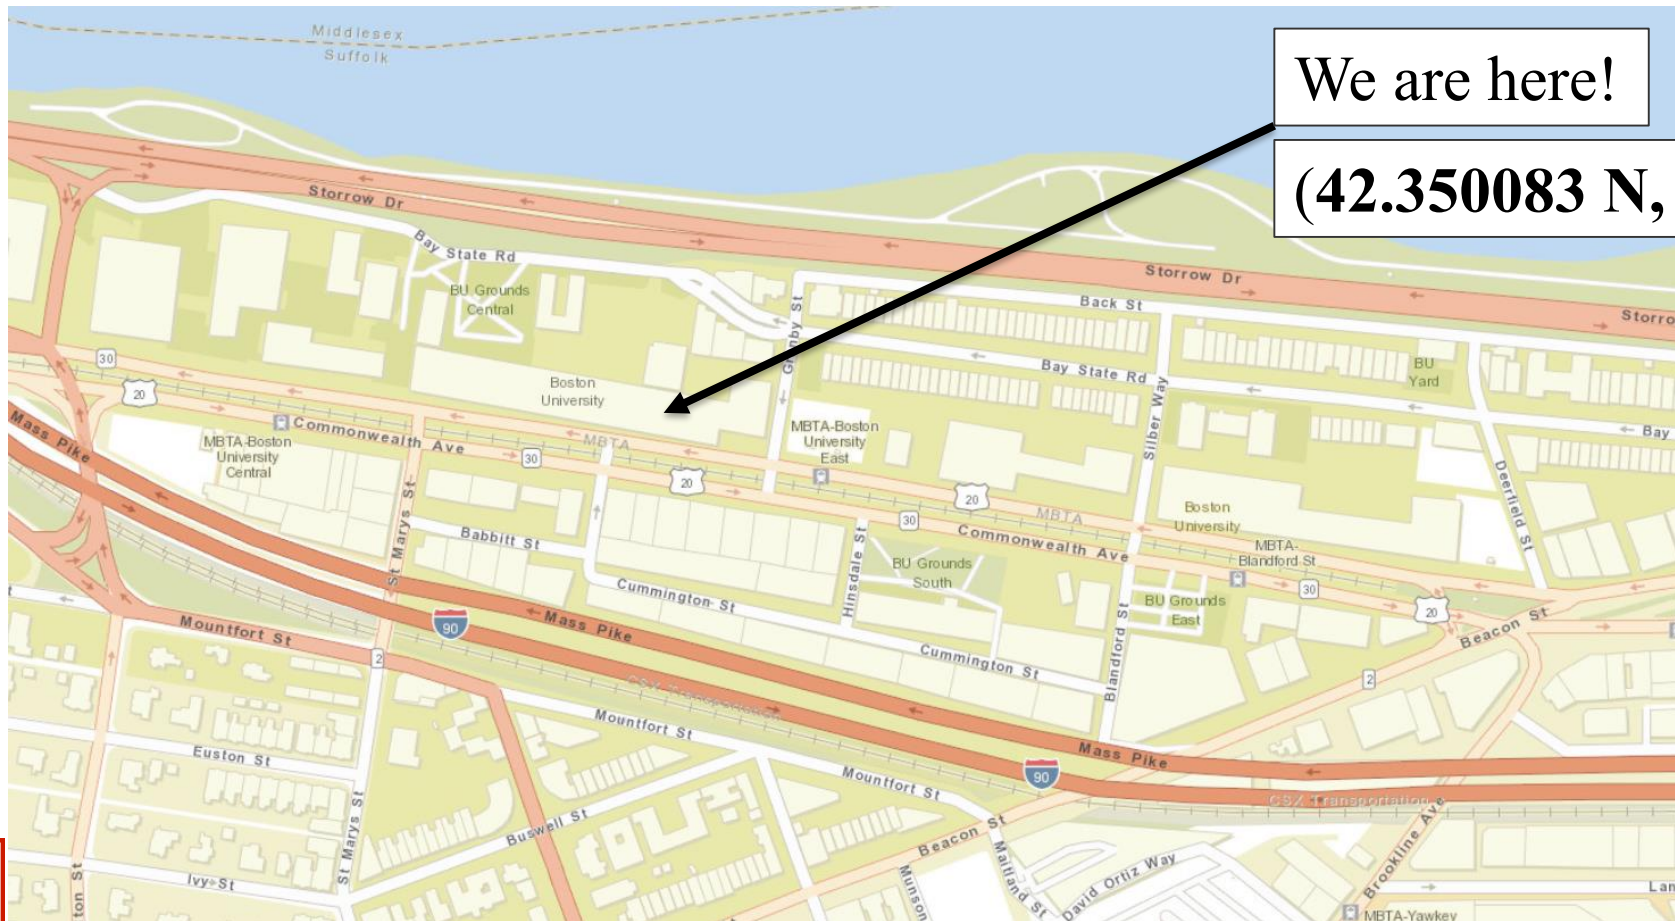

“A **geographic information system (GIS)** is a system designed to capture, store, manipulate, analyze, manage, and present spatial or geographic data.”

[https://en.wikipedia.org/wiki/Geographic\\_information\\_system](https://en.wikipedia.org/wiki/Geographic_information_system)

# GIS Theory – Geographic Coordinate System

# GIS Theory – Geographic Coordinate System

- How do I tell a computer where we are located on earth?

# GIS Theory – Geographic Coordinate System

## Cartesian Coordinate System

Point (2,2)

[https://www.e-education.psu.edu/natureofgeoinfo/c2\\_p10.html](https://www.e-education.psu.edu/natureofgeoinfo/c2_p10.html)

## Geographic coordinate system.

Parallels  
(Lines of latitude)

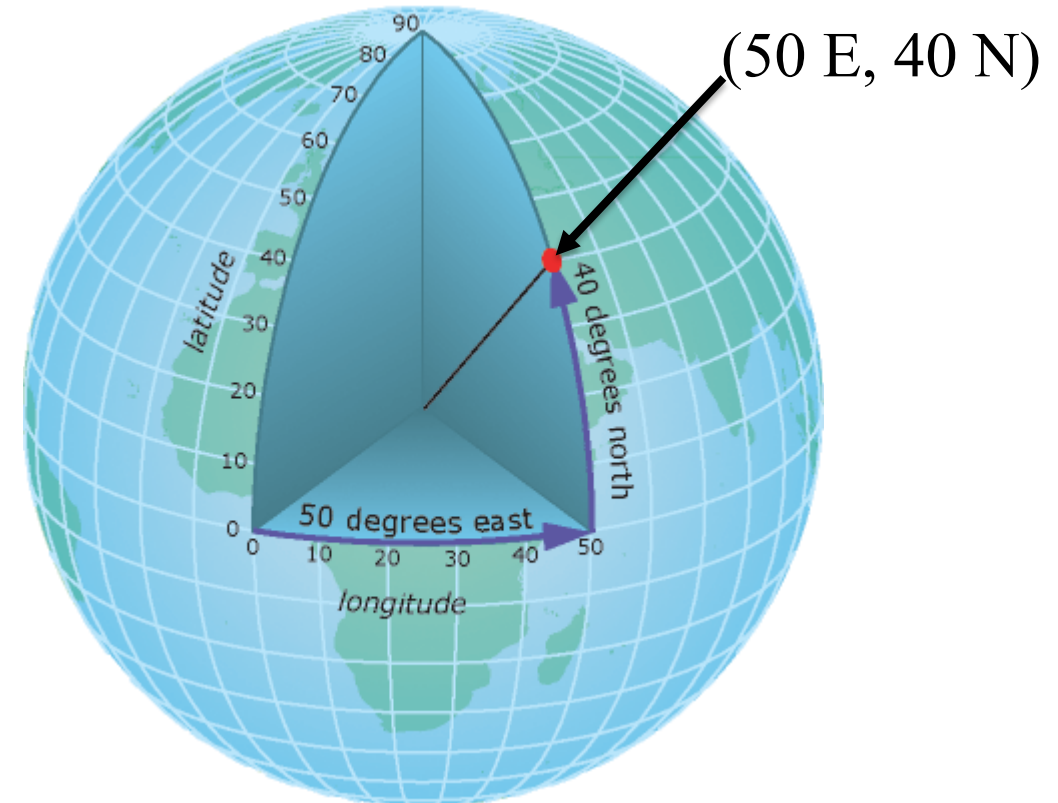

Meridians  
(Lines of longitude)

Graticular  
Network

<http://desktop.arcgis.com/en/arcmap/10.3/guide-books/map-projections/about-geographic-coordinate-systems.htm>

<http://desktop.arcgis.com/en/arcmap/10.3/guide-books/map-projections/geographic-coordinate-system.htm>

Defined by a math model.  
ArcGIS Online uses WGS 1984 Mercator

# GIS Theory – Projections

# GIS Theory - Projections

What is wrong with this map?

Country	Area ( mi ^2)
Africa	11,730,000
Antarctica	5,405,000
Greenland	836,300

# GIS Theory - Projections

# GIS Theory - Projections

World Fuller

Cube World

Polar NSIDC EASE Grid North

NAD 1983 UTM Zone 15N

# GIS Theory - Projections

- Allow creation of flat maps.
- At expense of distorting:
  - Shape
  - Area
  - Direction
  - Distance

# GIS Theory – Spatial Data Types

# GIS Theory – Spatial Data types

# GIS Theory – Spatial Data Types

## Vector

Points

Polylines

Polygon

# GIS Theory - Attributes

## Spatial Component

## Attribute Component

Location: 264,279.075 883,279.157 Meters	
Field	Value
CONDITION	GOOD
FACIL_TYPE	A*
FACILTYPE1	A
FACNAME	SCITUATE HARBOR
FEE	N
FISH_CODES	10,11,16,17
MAINTRESP	TOWN OF SCITUATE
NOLANES	2
NORAMPS	1
PAGE	0
RAMPTYPE	CONCRETE
TOWN	SCITUATE

# GIS Theory – Spatial Data types

# GIS Theory – Spatial Data Types

## Raster Data – continuous data

### Raster Spatial Properties

- Origin
- Cell Location
- Cell Size

# GIS Theory – Spatial Data Types

## Examples of Raster Data

- |                            |                   |
|----------------------------|-------------------|
| ■ Agriculture              | ■ Grass           |
| ■ Bare ground              | ■ Pine            |
| ■ Water                    | ■ Shadow          |
| ■ Deciduous                | ■ Urban/Developed |
| ■ Deciduous/<br>Pine mixed |                   |

# GIS Theory – Spatial Data Types

# ArcGIS Online – What is it?

# ArcGIS Online – What is it?

- Cloud Platform
- Create and share maps
- Create interactive map applications
  
- Paid service - Paid by CAS IT
- Certain processes consume “credits”

Credits by capability:

[https://doc.arcgis.com/en/arcgis-online/administer/credits.htm#ESRI\\_SECTION1\\_709121D2C7694DCAB9B8592F36F7A5BA](https://doc.arcgis.com/en/arcgis-online/administer/credits.htm#ESRI_SECTION1_709121D2C7694DCAB9B8592F36F7A5BA)

# ArcGIS Online – What is it?

- Key Words – Workflow:
  - **Layers** – Spatial data that can be imported into Map or Scene
  - **Map** – 2D map where spatial data can be imported and viewed.
  - **Scene** – 3D map where spatial data can be imported and viewed.
  - **Application** – A custom web map layout with specialized tools for exploring Map and Scenes.

# ArcGIS Online – What is it?

- Key Words – Data organization:
  - **My Content** – Items you created.
  - **My Favorites** – Items you marked as favorite.
  - **My Groups** - Items your group created.
  - **My Organization** - Items created by BU community.
  - **Living Atlas** – Items created by ESRI (trusted data)
  - **ArcGIS Online** – Items created by anyone in the world.

# ArcGIS Online – What is it?

- Key Words – Sharing Options:
  - **Owner/Private** – Only you can see it.
  - **My Organization** – Anyone at BU with an ArcGIS online account can see it.
  - **Everyone/Public** - The entire world can see it.

# Resources

## Get Started With Map Viewer

<https://learn.arcgis.com/en/projects/get-started-with-map-viewer/arcgis-online/>

Get Started:

<https://doc.arcgis.com/en/arcgis-online/get-started/get-started.htm>

Try ArcGIS Online:
